

## Problems Caused by Contamination of Optical Fiber:

- Light is poorly transmitted or not transmitted at all.
- Light reflects back, causing it to return to the transmission point & hinder the connection.

*Click&Clean prevents transmission errors by cleaning the ferrule inside optical adapters & cable connectors*

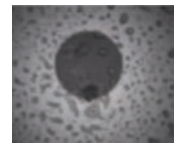

Manufactured by NTT-AT, Japan

## Effectively Removes:

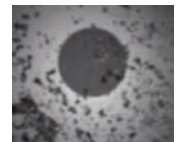

- Dust

- Skin oil

- Fiber residue

### Click&Clean-LC

Part#: CLEANER-125-LC

- Cleans LC connectors, ports, & adapters
- 750+ uses per cleaning cartridge
- Replacement cartridges available (Part# CLEANER-125-LCR)

### Click&Clean-SC

Part#: CLEANER-250-SC

- Cleans SC connectors, ports, & adapters
- 750+ uses per cleaning cartridge
- Replacement cartridges available (Part# CLEANER-250-SCR)

### Click&Clean-MPO

Part#: CLEANER-MPO

- Cleans MPO/MTP connectors, ports, & adapters
- 600+ uses

### For the fiber

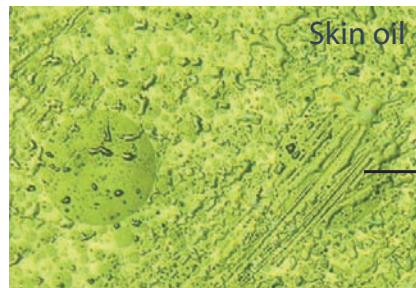

### For the port

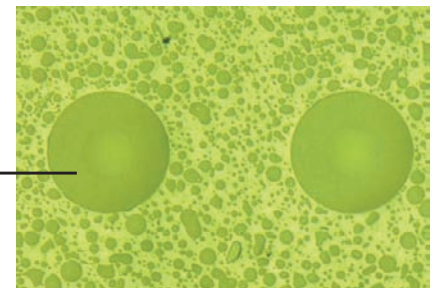

## Cleans dust & oil with just *one push!*
